

Halogen compounds

Q 0090

10- 081

**Direct and Regioselective Iodination and Bromination of Benzene, Naphthalene and Other Activated Aromatic Compounds Using Iodine and Bromine or Their Sodium Salts in the Presence of the  $\text{Fe}(\text{NO}_3)_3 \cdot 1.5\text{N}_2\text{O}_4$ /Charcoal System. —**

Iodination and bromination of reactive arenes is readily achieved using elemental halogen or the corresponding sodium halide under conditions A. — (FIROUZABADI\*, H.; IRANPOOR\*, N.; SHIRI, M.; Tetrahedron Lett. 44 (2003) 49, 8781-8785; Dep. Chem., Coll. Sci., Shiraz Univ., Shiraz 71454, Iran; Eng.) — Mais
