Novel Asymmetric Synthesis of (S)-Esmolol Using Hydrolytic Kinetic Resolution.

— The key intermediate (S)-(**I**) is obtained by hydrolytic kinetic resolution using Jacobsen catalyst. Esmolol (**IV**) is a short-acting cardioselective β -blocker. — (NARSAIAH*, A. V.; KUMAR, J. K.; *Synth. Commun.* 41 (2011) 11, 1603-1608, <http://dx.doi.org/10.1080/00397911.2010.488495>; *Org. Chem. Div., Indian Inst. Chem. Technol., Hyderabad 500 007, India; Eng.*) — K. Woydowski
