Azole Antifungal Agents Related to Naftifine and Butenafine. —

Six compounds of type (I) and (II) are prepared and evaluated in vitro against several pathogenic fungi responsible for human diseases. (I) and (II) are found to inhibit the growth of dermatophytes with a potency comparable to that of the known naftifine. — (CASTELLANO, SABRINA; LA COLLA, PAOLO; MUSIU, CHIARA; STEFANCICH, GIORGIO; Arch.
