**Convenient Synthesis of Valsartan via a Suzuki Reaction.** — An efficient synthesis of the angiotensin II inhibitor valsartan (VI) is presented with a Suzuki coupling for aryl—aryl bond formation as the key step. Application of this approach provides an industrial viable procedure. — (GHOSH, S.; KUMAR, A. S.; MEHTA\*, G. N.; J. Chem. Res. 34 (2010) 4, 191-193, DOI:10.3184/030823410X12698758703526 ; Appl. Chem. Dep., Sardar Vallabhbhai Natl. Inst. Technol., Surat 395 007, India; Eng.) — H. Haber
